### **Program**

Want a “bottom line” approach to what works in adhesive and esthetic dentistry? This course will provide real-world, time-proven information on a variety of topics critical to consistent long-term success in conservative esthetic dentistry. The course will begin with an evidence-based overview of adhesive dentistry focusing on what works and what doesn't. Are self-etch adhesives still the answer? How can you best eliminate sensitivity? Avoid problems with posterior composites? What about new chemotherapeutic agents? Abfractions? Pulp capping? Light curing? Is a metal-free practice really the way to go? How can you achieve optimal esthetics with minimal intervention? This presentation will separate fact from fiction in all these areas and more. See step-by-step procedures for achieving esthetic porcelain veneers that will last, along with innovative approaches to white spot removal and the latest on tooth whitening.

### **What You Will Learn**

**This course will provide vital information for the general practitioner including the following topics:**

- Dental adhesives: Separating fact from fiction?
- Dental desensitization techniques: What really works?
- Abfractions: Causes and treatment
- Flowable composites: Pros and cons.
- High tech composites: Nanofilled and/or low shrinkage.
- White spot removal: ACP, microabrasion, macroabrasion, and partial veneers
- Chemotherapeutics: How best to manage the high-risk patient
- Posterior composites: How to avoid problems.
- The metal free practice: Oh really?
- Pulp capping: What really works?
- Tooth whitening: What works best?
- Porcelain veneers: How to make them last.

### **Hotel Information**

A limited number of rooms have been reserved for this meeting at the Hyatt Regency Lexington for September 24. Reservations for overnight accommodations are \$114 single or double occupancy. Please make your reservations directly prior to the cut-off date of August 24, 2009. Call (800) 233-1234 or (859) 253-1234 for reservations. Mention University of Kentucky College of Dentistry when making your reservations.

## **Speaker**

**Harald O. Heymann, DDS, Med,** is Professor and Director of Graduate Operative Dentistry at the University of North Carolina School of Dentistry and participates in a dental practice devoted largely to esthetic dentistry. He is the author of over 180 scientific publications, co-editor of *The Art and Science of Operative Dentistry*, editor-in-chief of the *Journal of Esthetic and Restorative Dentistry* and is the Recipient of the Gordon J. Christensen Award for Excellence. Dr. Heymann has given over 1,000 lectures on various aspects of esthetic dentistry worldwide, and is a guest lecturer at the L.D. Pankey Institute as well as a board member of the CRA Foundation.
