

# HIV Positive Infected Patients Needed For an Observational Study of The Safety of MARAVIROC

The faculty and staff of the University of Kentucky Department of Infectious Disease Research are conducting a prospective observational study of the safety of maraviroc used with optimized background therapy in treatment experienced HIV-1 infected patients.

You may be eligible to participate if you:

- are HIV-1 infected;
- 18 years of age and older;
- have antiretroviral treatment experienced and considering taking the CCR5 antagonists called Maraviroc.

Qualified participants will receive an appropriate HIV-1 tropism assay as a screening for eligibility to receive maraviroc. For more information, please email [hhvaug3@uky.edu](mailto:hhvaug3@uky.edu) or call

**(859) 323-3933.**
