Kentucky Institute of Medicine Ranking <sup>6</sup> , 2007 (Higher numbers indicate poorer health outcomes)	37.0	60.5

\*Data unavailable.

<sup>1</sup>Unweighted, 3-year pooled estimate--- Source: Kentucky Behavioral Risk Factor Surveillance System, 2005-2007;

Use caution interpreting this estimate for the county since the sample size is < 50.

<sup>2</sup>Rate per 10,000 adult smokers--- Source: Local Health Department Tobacco Cessation Survey, 2007. The state rate excludes data from Breathitt County since the number of smokers reached by tobacco cessation programs was significantly higher than all other health department service areas and including it would have made the state average artificially high.

<sup>3</sup>Kentucky Department for Public Health, Office of Vital Statistics, 2006. Data are considered preliminary. Use caution when interpreting this estimate.

<sup>4</sup>UK Tobacco Policy Research Program, <http://www.mc.uky.edu/tobaccopolicy/KentuckyDataReports/> --- Workplace policy 2008; School Policy 2007. Workplace policy study includes only manufacturers with 50 or more employees. School policy study includes public and private middle and high schools.
