## Faculty Welcomes Three Additions

**Dr. James "Jimmy" T. Lee**

Dr. Lee joined UK HealthCare's Department of Radiology last month, accepting a faculty position in Emergency Radiology. Originally from Texas Dr. Lee did his Radiology residency here at the University of Kentucky. Though he abandoned UK for a year to complete a Body Imaging fellowship at the University of California, San Diego, we're happy that he's returned to the Bluegrass.

**Dr. Rashmi T. Nair**

Dr. Nair comes to us from the Cleveland Clinic, Cleveland Ohio where she was a member of the Abdominal Imaging Division. During her fellowship year in Abdominal Imaging and Intervention at the Department of Radiology, Brigham and Women's Hospital, Harvard Medical School, she received the 2005 Douglass Adams Research Prize. The Abdominal Imaging section is proud to be her new home.

**Dr. Kwaku K. Obeng**

Dr. Obeng completed his Radiology residency at the Medical University of South Carolina, Charleston. Following that, he traveled to Philadelphia for two year fellowship in Neuroradiology at the Hospital of Pennsylvania. Dr. Obeng is a superb addition to UK radiology's already superb Neuroradiology division.

# From the Desk of the Chair

August 2011

Another academic year is in full swing. We have welcomed new faculty, a fellow, and residents to our department. Clinical care, learning and teaching, research and scholarship abound.

What sets us apart from others who do what we do? Trite as it may sound...it's all about you --- the people --- who are reading this editorial. Of course, we have imaging technology, information systems, medical devices. But, without those of you who know how to use and apply these sophisticated tools, I could not possibly even begin to imagine providing the level of excellent radiological care of patients that we do. And, we do it day after day, week after week, year after year. Exhausting!  
Seriously, take a moment --- just a moment, please --- to reflect on your contributions to UK HealthCare and the citizens of Kentucky and surrounding communities. Now, gently but firmly pat yourself on the back and then get back to work!

## July Presentations and Publications

Dr. Attili

Dr Capasso

Dr. Conrad

Dr. Sinha

Dr Winkler

**Dr. Winkler, Hayes D, Hall M, Capasso P, Attili AK**

“Preprocedural Planning for Bronchial Artery Embolization in Cystic Fibrosis Patients with Massive Hemoptysis: the Value of Prospectively Triggered Multi-Detector Row CT Angiography”  
Society of Cardiac Computed Tomography (SCCT) Annual Meeting  
Denver, CO

**Winkler MA, Hobbs S, Messinger J, Jones E, Attili AK.** Computed Tomography Guided Pericardial Interventions. .  
Society of Cardiac Computed Tomography (SCCT) Annual Meeting, Denver, CO, July 2011.

**Sinha P, Conrad GR,** West HC. Response of Thyroglobulin to Radioiodine Therapy in Thyroglobulin-elevated Negative Iodine Scintigraphy (TENIS) Syndrome. Anticancer Res. 2011 Jun;31(6):2109-12.

**McCullough PA, Capasso P.** Patient Discomfort Associated with the Use of Intra-Arterial Iodinated Contrast Media: A Meta-Analysis of Comparative Randomized Controlled Trials. BMC Medical Imaging. 2011 July 24;11:12.

## Tech Talk

Congratulations to Gary Hibbits, B.A., R.T.(R)(CT)(MR)(ARRT) on his recent completion of the inaugural “Operations Managers University.”

Nineteen UK HealthCare managers met monthly during the past year, broadening their knowledge base and skill set from team development to process improvement.

Jonathan Curtright, Chief Operating Officer for Ambulatory Services, initiated and sponsored the program to encourage continuous improvement for our clinical managers. The workshops were lead by administrators from across UK HealthCare, who shared their broad range of experience and expertise.

## Meet our New Employee

**Jennifer Conklin**, Ultrasound Technologist, Chandler  
**Welcome!**

# Staff Education

University of Kentucky  
Department of Radiology  
Clinical Education  
"Basic Building Blocks  
for  
Pediatric Imaging"  
Presents . . . . .  
July-December 2011  
Are you ready to  
learn?

The quilt graphic features a central arrangement of six colorful blocks representing different imaging modalities: CT (top, pink), IR (middle-left, yellow), MR (middle-right, orange), NM (bottom-left, green), US (bottom-center, blue), and XRAY (bottom-right, purple). The blocks are set against a dark background with a decorative border of small squares.
