

Quality of Life Research Study in Patients with Thyroid Cancer

Researchers at the University of Kentucky Medical Center Department of Otolaryngology are conducting a research study to assess the quality of life in patients with thyroid cancer treated either by surgery, radioactive iodine, or external-beam radiation therapy. We are using head-and-neck cancer patients treated with external-beam radiation therapy as controls.

Research Investigator Michele Streeter, M.D., is conducting this study. For more information, or to schedule an appointment call (859) 257-5405.
