WHEREAS, the Board of Commissioners has made findings establishing that the smoking of tobacco products produces a form of air pollution, a danger to health and a material public nuisance. And after significant study and debate of the issues deems it to be in the best interests of the citizens of Henderson, Kentucky, to adopt this regulation of smoking in public places and places of employment.

NOW, THEREFORE, BE IT ORDAINED by the City of Henderson, Kentucky, as follows:

Section 1. Findings and Intent: The City of Henderson Board of Commissioners finds that:

A. Numerous studies have found that tobacco smoke is a major contributor to indoor air pollution. Breathing secondhand smoke is a cause of disease in healthy nonsmokers. These diseases include heart disease, stroke, respiratory disease and lung cancer. The National Cancer Institute determined in 1999 that secondhand smoke is responsible for the early deaths of up to 65,000 Americans annually. (National Cancer Institute (NCI), "Health effects of exposure to environmental tobacco smoke: the report of the California Environmental Protection Agency. Smoking and Tobacco Control Monograph 10," Bethesda, MD: National Institutes of Health, National Cancer Institute (NCI), August 1999.)

B. The Public Health Service's National Toxicology Program (NTP) has listed secondhand smoke as a known carcinogen. (Environmental Health Information Service (EHIS), "Environmental tobacco smoke: first listed in the Ninth Report on Carcinogens," U.S. Department of Health and Human Services (DHHS), Public Health Service, NTP, 2000; reaffirmed by the NTP in subsequent reports on carcinogens, 2003, 2005.)

C. A study of hospital admissions for acute myocardial infarction in Helena, Montana before, during, and after a local law eliminating smoking in workplaces and public places was in effect, has determined that laws to enforce smoke-free workplaces and public places may be associated with a reduction in morbidity from heart disease. (Sargent, Richard P.; Shepard, Robert M.; Glantz, Stanton A., "Reduced incidence of admissions for myocardial infarction associated with public smoking ban: before and after study," British Medical Journal 328: 977-980, April 24, 2004.)

D. Secondhand smoke is particularly hazardous to the elderly, individuals with cardiovascular disease and individuals with impaired respiratory function, including asthmatics and those with obstructive airway disease. Children exposed to secondhand smoke have an increased risk of asthma, respiratory infections, sudden infant death syndrome, developmental abnormalities, and cancer. (California Environmental Protection Agency (Cal EPA), "Health effects of exposure to environmental tobacco smoke", Tobacco Control 6(4): 346-353, Winter, 1997.)

E. The Americans With Disabilities Act, which mandates access to public places and workplaces for persons with disabilities, deems impaired respiratory function to be a disability. (Daynard, R.A., "Environmental tobacco smoke and the Americans with Disabilities Act," Nonsmokers' Voice 15(1): 8-9.)

F. The U.S. Surgeon General has determined that the simple separation of smokers and nonsmokers within the same air space may reduce, but does not eliminate, the exposure

of nonsmokers to secondhand smoke. (Department of Health and Human Services. The Health Consequences of Involuntary Smoking: A Report of the Surgeon General. Public Health Service, Centers for Disease Control, 1986.)

G. The Environmental Protection Agency has determined that secondhand smoke cannot be reduced to safe levels in businesses by high rates of ventilation. Air cleaners, which are only capable of filtering the particulate matter and odors in smoke, do not eliminate the known toxins in secondhand smoke. (Environmental Protection Agency (EPA), "Indoor air facts no. 5: environmental tobacco smoke," Washington, D.C.: Environmental Protection Agency (EPA), June 1989.)

H. The Centers for Disease Control and Prevention has determined that the risk of acute myocardial infarction and coronary heart disease associated with exposure to tobacco smoke is non-linear at low doses, increasing rapidly with relatively small doses such as those received from secondhand smoke or actively smoking one or two cigarettes a day and has warned that all patients at increased risk of coronary heart disease or with known coronary artery disease should avoid all indoor environments that permit smoking. (Pechacek, Terry F.; Babb, Stephen, "Commentary: How acute and reversible are the cardiovascular risks of secondhand smoke?" *British Medical Journal*, 328: 980-983, April 24, 2004.)

I. A significant amount of secondhand smoke exposure occurs in the workplace. Employees who work in smoke-filled businesses suffer a 25-50% higher risk of heart attack and higher rates of death from cardiovascular disease and cancer, as well as increased acute respiratory disease and measurable decrease in lung function. (Pitsavos, C.; Panagiotakos, D.B.; Chrysohoou, C.; Skoumas, J.; Tzioumis, K.; Stefanadis, C.; Toutouzas, P., "Association between exposure to environmental tobacco smoke and the development of acute coronary syndromes: the CARDIO2000 case-control study," *Tobacco Control* 11(3): 220-225, September 2002.)

J. Smoke-filled workplaces result in higher worker absenteeism due to respiratory disease, lower productivity, higher cleaning and maintenance costs, increased health insurance rates, and increased liability claims for diseases related to exposure to secondhand smoke. ("The high price of cigarette smoking," *Business & Health* 15(8), Supplement A: 6-9, August 1997.)

K. Numerous economic analyses examining restaurant and hotel receipts and controlling for economic variables have shown either no difference or a positive economic impact after enactment of laws requiring workplaces to be smoke-free. Creation of smoke-free workplaces is sound economic policy and provides the maximum level of employee health and safety. (Glantz, S.A.; Smith, L., The Effect of Ordinances Requiring Smoke-Free Restaurants on Restaurant Sales in the United States. *American Journal of Public Health*, 87:1687-1693, 1997; Colman, R.; Urbonas, C.M., "The economic impact of smoke-free workplaces: an assessment for Nova Scotia, prepared for Tobacco Control Unit, Nova Scotia Department of Health," GPI Atlantic, September 2001.)

L. Smoking is a potential cause of fires; cigarette and cigar butts and ash stains on merchandise and fixtures causes economic damage to business health 15(8), Supplement A: 6-9, August 1997.)

M. The smoking of tobacco is a form of air pollution, a danger to health and a material public nuisance.

Accordingly, the Board of Commissioners adopts the foregoing as justification for this Ordinance, the purpose of which is

(1) To protect the public health and welfare by prohibiting smoking in public places and places of employment; and

(2) To guarantee the right of nonsmokers to breathe smoke-free air; and

(3) To recognize that the public's need to breathe smoke-free air shall have priority over the individual's desire to smoke.

Compliance is achieved under this subsection if the owner or agent of the premises orders the person violating the Ordinance to leave its premises and promptly notifies the police if the person refuses.

3. In the event the person [or persons] violating this Ordinance fails or refuses to comply with this directive and the owner, manager, operator or employee who observed the violation or if a different person who directed the person [or persons] in violation to leave the premises, fails to take immediate and reasonable steps to obtain the removal of the person [or persons] from the premises, the owner, manager, operator or employee failing to take appropriate steps required by this Ordinance shall be in violation of this Ordinance.

5. An employee who observes a person [or persons] violating this Ordinance may immediately notify his or her owner, manager or supervisor of the violation in satisfaction of the employee's responsibility under this Ordinance. The failure of the employee's owner, manager or supervisor to take appropriate steps required by this

Ordinance in response to the employee's notice shall not constitute a violation on the part of the employee.

6. 7. The mere presence of a person smoking within premises of an establishment governed by this Ordinance does not constitute a violation on the part of the establishment. The establishment and its agents shall only be charged for a violation of this Ordinance if the responsible agent[s] of the establishment fail to timely satisfy each responsibility prescribed for them in this Section.

F. Notwithstanding any other provision of this Ordinance, the City, the Henderson County Health Department, an employee, or any person aggrieved by a failure to comply with this Ordinance, whether by commission or omission, including violations on the part of an owner, operator, manager, employee or other person[s] in control of a public place or a place of employment covered by this Ordinance may bring legal action to enforce this Ordinance, either by civil action seeking injunctive relief or by criminal complaint in a court of competent jurisdiction.

D. In addition to the fines established by this Section, violations of this Ordinance by a person who owns, manages, operates, or otherwise controls a public place or place of employment may result in the suspension or revocation of any permit or license issued to the person for the premises on which the violation occurred.

E. Violation of this Ordinance is declared to be a public nuisance, which may be abated by the City or its designated agents by restraining order, preliminary and permanent injunction, or other means provided for by law. The City may recover the reasonable costs of any court enforcement action seeking abatement of this nuisance.

F. Each day on which a violation of this Ordinance occurs shall be considered a separate and distinct violation.
